

Delivering connected stadiums for unforgettable fan experiences and streamlined operations

Integrated network solutions that power seamless connectivity that engages fans, streamlines operations, and drives venue performance.

From the first tap of a digital ticket to the last cheer of the crowd, every fan moment is shaped by connectivity. BAI Communications (BAI) powers stadiums with the robust, high-capacity networks needed to support modern fan experiences and real-time operations.

Our in-building connectivity and private mobile network (PMN) solutions ensure strong mobile signals throughout the venue – from seating bowls and VIP lounges to concourses and back-of-house. Enable cashless payments, interactive apps, and real-time event alerts, while supporting crowd control, security systems, and IoT infrastructure.

With decades of experience in mission-critical communications, BAI Communications understands the demands of high-density, high-pressure environments like stadiums. We bring together the best of private mobile networks, public wireless solutions, and in-building connectivity to deliver a stadium-wide network tailored to your needs.

Whether your focus is delivering cutting-edge fan experiences, optimising operational workflows, or preparing for the demands of 5G and IoT integration, BAI provides the expertise and technology to keep your stadium connected, secure, and competitive.

Features

Seamless connectivity

Smart stadium management and operational efficiency

Fan engagement and interactive experiences

Real-time event tracking and in-seat services

Audience insights

Benefits

Reliable mobile and Wi-Fi coverage across the venue, enabling social sharing, streaming, and live content access.

Enhance operational control and safety with IoT sensors, real-time alerts, and connected staff communications.

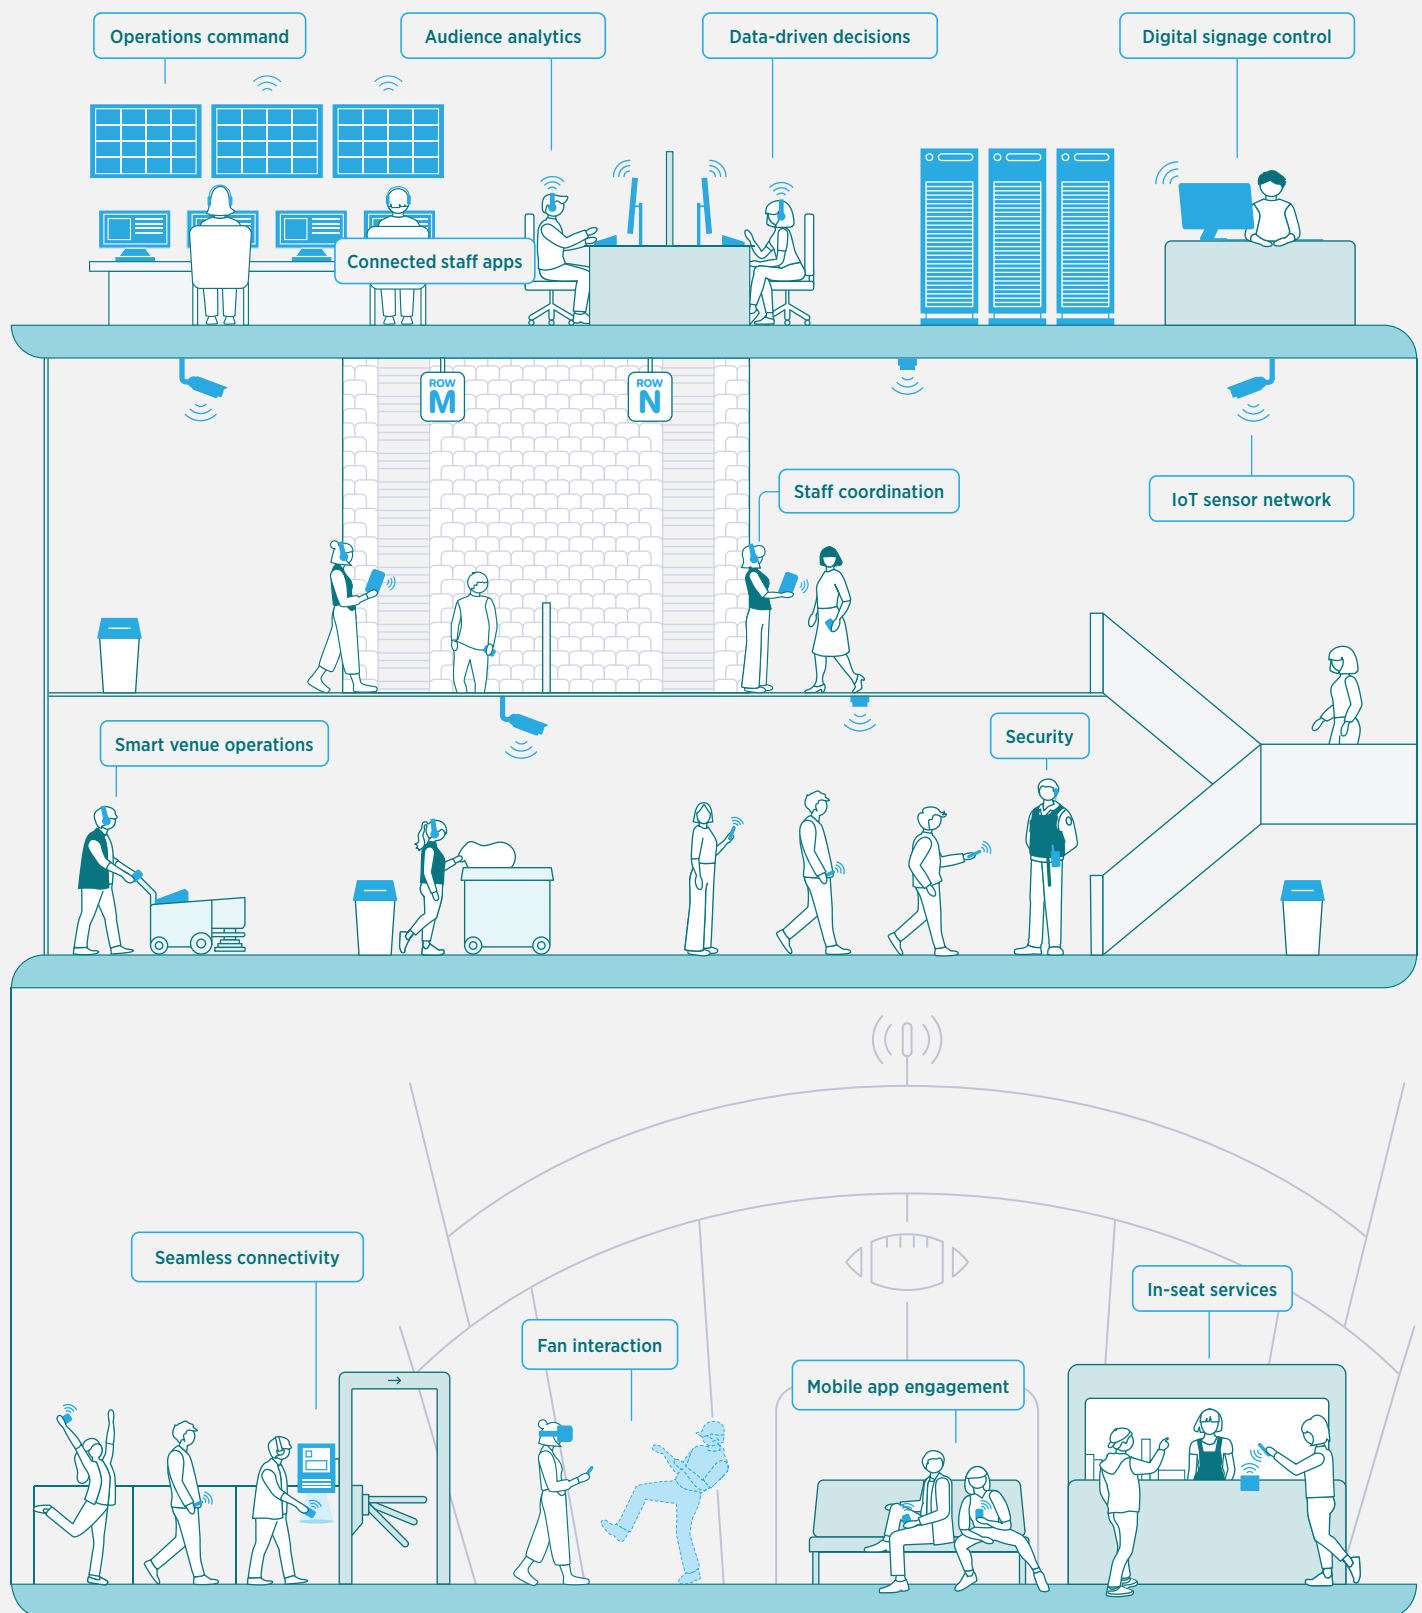

Power immersive AR/VR, in-seat services, and personalised notifications that boost fan satisfaction and spend.

Real-time tracking of fan movements and the ability to offer personalised services such as food and beverage ordering, seat upgrades, and merchandise availability.

Unlock actionable audience insights and monetisation via digital signage, app interactions, and real-time tracking.

Powering stadium experiences through seamless connectivity
